

Aranet Radon Plus

Fastest battery operated radon sensor

- **National Radon Proficiency Program (NRPP)** approved measurement device.
- **Patented** battery-powered ionization chamber technology.
- Achieve full accuracy in **just 1 hour**.
- Battery life that can last for **up to 7 years**, ensuring long-term reliability.
- **Wireless** sensor, designed for seamless connectivity and effortless integration.

Radon levels

Relative Humidity

Temperature

Atmospheric pressure

Designed and manufactured in Latvia (Europe)

Aranet Radon Plus sensor combines best-in-class features for effective radon gas measurements.

Radon readings are delivered by a unique, patent-pending, battery-powered ionization chamber technology that provides an initial measurement in 10 minutes, achieves full accuracy in just 1 hour, and offers long-lasting battery life!

Radon gas is tasteless, odorless, and hard to detect

It possesses serious health risks. It escapes from the ground into the air and can accumulate in your home. According to the World Health Organization (WHO), radon is one of the leading causes of lung cancer. Since its levels can fluctuate, regular radon monitoring is vital.

Green

(Under 2.7 pCi/L)
Under 100 Bq/m³

Recommended by WHO as national reference for annual average residential radon concentration.

Yellow

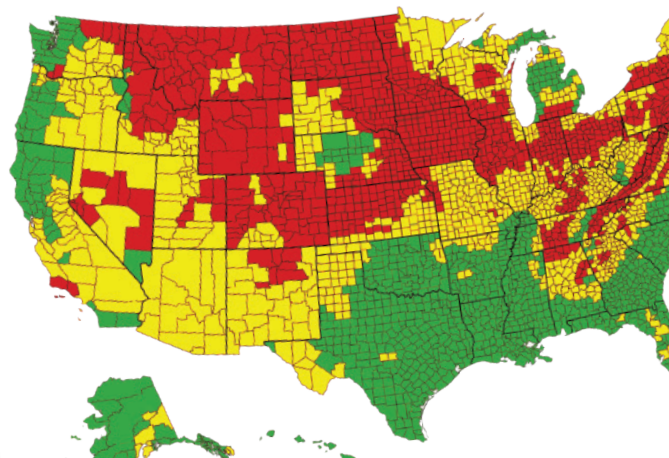

(2.7 pCi/L to 8.1 pCi/L)
100 Bq/m³ to 300 Bq/m³

Recommended by WHO as national reference annual average residential radon concentration even for countries with specific conditions.

Red

(Above 8.1 pCi/L)
Above 300 Bq/m³

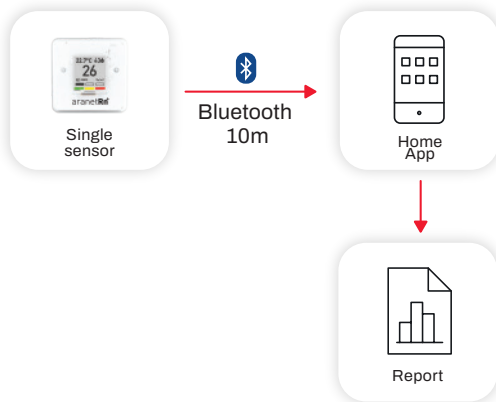

Prolonged exposure to such high radon concentrations are linked to serious, long-term health risks.

Which Sensor to Choose?

Radon Plus HOME

One-point measurement –
Perfect for general insights

Connectivity

Bluetooth connection only! Use the sensor with the Aranet Home app

Data access

On-site via the sensor screen and Aranet Home app

Data history

35 days

Reports

CSV measurement report for one sensor

Radon Plus PRO

Multi-point measurements with several sensors –perfect for in-depth insights.

Connectivity

Aranet long-range (Aranet LoRa) connectivity.
Range up to several hundred meters indoors to connect with the base station!

Use Bluetooth for connection with the Aranet Home app and sensor firmware updates.

Certification

National Radon Proficiency Program (NRPP) approved measurement device.

Data access

Remote access and analysis with Aranet Cloud.

On-site: sensor screen, Home app, base station user interface.

Data history

Up to 5 years

Reports

Remote export of measurement reports from all sensors in CSV, PDF, or XLSX format.

Additional sensors

Add any other Aranet PRO series sensors, such as CO₂, temperature, relative humidity, and more.
